

Appl. No. : 09/574,626
Filed : May 19, 2000

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph between lines 18 and 23 on page 10 with the following amended paragraph:

As a metal, silver is able to reflect light by itself. Even if the efficiency of this reflection is low, it exists and can be used in order to localise the silver precipitate (spots). Because if of its metal nature, other methods like variations of an electromagnetic field or electric conductance are also possible.
